PROFILE

A developer who works at the intersection of design and engineering — translating Photoshop concepts into fully configured, interactive products that customers can personalise and purchase. Solely responsible for getting 99% of a live print-on-demand catalogue onto a WooCommerce storefront, each product configured end-to-end through Mediaclip's platform-specific JavaScript engine. I bring a rare combination of design literacy, technical implementation, and commercial awareness — evidenced by products I've built generating over £43,000 in net sales.

WORK EXPERIENCE

Developer · **Print on Demand Worldwide** · *December 2023 – Present*

Photobubble is a Print on Demand Worldwide brand offering personalised products including photobooks, mugs, and prints. My role sits primarily within Photobubble, responsible for the full pipeline from Photoshop design to live, purchasable product on WooCommerce — independently managing every stage including asset extraction, platform-specific JavaScript configuration in Mediaclip, and ongoing quality assurance. I also contribute across the wider business, supporting production, finance, and customer service systems as needed.

Key projects and achievements:

- **Foil Photobooks:**
Launched a new foil photobook category from scratch — 41 designs implemented, 11 personally designed. Generated £24,400 in net sales (867 items). Monitor all orders and proactively resolve customer errors.
- **Polaroid Boxes:**
Conceived and delivered a new dieline-based product format end-to-end — Illustrator files, VeloBlade machine operation, production documentation, and marketing mock-ups. 130 products live; 93 items sold.
- **Coffee Table Photobooks:**
 - 105 designs implemented since March 2025. Built a platform-wide clipart library with colour personalisation and 50+ background designs. Generated £19,230 in net sales (771 items).
- **Weddings range:**
Leading delivery of a new Weddings range projected at £80,000/year revenue. Learned VDP in Mediaclip from scratch, liaised directly with Mediaclip to unblock the launch, and am building a custom menu UI. 23 designs built across 27 planned product types.
- **Costing & margin analysis (role expansion):**
Took on an expanded merchandiser/finance remit — gathering production and shipping costs from the production manager and producing profit-per-line and overall margin reports comparing costs against customer sales prices. Reports shared with the Photobubble team and accounts department to inform pricing decisions.

Day-to-day responsibilities:

Design & implementation:

- Mediaclip platform-specific JavaScript — selector logic, variant conditions, font loading, and collage creation
- Adobe Photoshop — product artwork, layer management, and asset extraction

- Adobe Illustrator — dieline files for the VeloBlade cutting machine
- HTML & CSS — WooCommerce platform management, plugin updates, menu rebuilds

Platform & systems:

- VB.NET & SQL — file download processes, production integrations, internal systems, and daily order/database queries including customer addresses, product data, and order status
- WooCommerce product setup and Google product feed management
- Designer library maintenance — clipart, backgrounds, and fonts

Operations & support:

- Sales reporting, surveys, and production costing
- Production floor support — VeloBlade and sublimation equipment when required
- Customer service cover — resolving order and project file queries, handling emails and phone when needed

Campaign Implementation & Programmatic Executive · Bauer Media · February 2022 – December 2023

- Implemented and tested creative for digital ad campaigns in Google Ad Manager (GAM)
- Set up PMP deals and managed private marketplace integrations with external partners
- Integrated new header bidder solutions including Amazon TAM and Ozone
- Reported on integration performance and resolved technical issues
- Used sales management systems including Adpoint and Operative.One

Buying & Merchandising Assistant · Ideal Shopping Direct Ltd (Deramores) · January 2021 – January 2022

- Managed product setup on Shopify with SEO-focused product pages
- Controlled stock levels, reordering, and slow-line strategies
- Reported on weekly and YTD sales performance, flagging areas of concern
- Coordinated samples for TV shows and photography, and performed QA on stock

Retail Store Associate · TK Maxx, Peterborough · October 2017 – January 2021

- Delivered consistent customer service in a high-footfall retail environment, resolving queries and complaints on the spot
- Operated as a cashier handling checkout responsibilities and cash management
- Assisted with visual merchandising, stock organisation, and display arrangement
- Supported the wider team across departments during busy periods and peak trading
